***Specification***

The examiner has not checked the specification to the extent necessary to determine the presence of **all** possible minor errors (grammatical, typographical and idiomatic). Cooperation of the applicant(s) is requested in correcting any errors of which applicant(s) may become aware of in the specification, in the claims and in any future amendment(s) that applicant(s) may file.

Applicant(s) is also requested to complete the status of any copending applications referred to in the specification by their Attorney Docket Number or Application Serial Number, **if any**.

***The status of the parent application(s) and/or any other application(s) cross-referenced to this application, or discussed in the specification, should be updated in a timely manner.***

***Claim Rejections - 35 USC § 112***

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 1, 2, 13-16, 22, 23 and 25-30 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

These claims are indefinite in the recitation of "elevated" temperatures and pressures. Since neither a catalyst nor a process of any sort is recited, "elevated" is a

relative term with no point of reference and the metes and bounds of the claims are unclear.

Claims 13 and 14 lack antecedent basis in step "c" for "the hydrocracked feedstock" earlier in the claim.

***Claim Objections/Allowable Subject Matter***

Claims 3-12, 17-21, 24, 31 and 32 are objected to as being dependent on a rejected base claim but would be allowable if rewritten or amended to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action.

***Conclusion***

Applicants are advised that any evidence to be provided under 37 CFR 1.131 or 1.132 and any amendments to the claims and specification should be submitted prior to final rejection to be considered timely. It is anticipated that the next office action will be a final rejection.
